International Air Services Commission

DETERMINATION

Determination: [2024] IASC 119
The Route: Hong Kong
The Applicant: Tasman Cargo Airlines
(Tasman Cargo) (ABN 073 412 272)
Public Register File: IASC/APP/202423

The Commission makes a determination allocating to Tasman Cargo Airlines one (1) frequency per week to operate dedicated freight services on the Hong Kong route. The determination is valid for five years from 26 June 2024.

1 The application

1.1 On 23 May 2024, the International Air Services Commission (the Commission) received an application from Tasman Cargo Airlines (Tasman Cargo) for an allocation of one (1) frequency per week in each direction to operate all-cargo services on the Hong Kong route. Tasman Cargo proposes to operate one additional frequency in each direction between Sydney and Hong Kong from July 2024, using Boeing 777-200LRF/Boeing B777-300ERSF freighter aircraft wet-leased from Kalitta Airways, with a payload capacity of up to 106.5 metric tonnes per flight (subject to performance limitations).

1.2 In accordance with section 12 of the *International Air Services Commission Act 1992* (the Act), on 24 May 2024, the Commission published Tasman Cargo's application on the Commission's website and subsequently sent a notification by email to stakeholders inviting other applications for capacity on the Hong Kong route. No other applications were received.

1.3 All non-confidential material supplied by the applicant is available on the Commission's website (www.iasc.gov.au).

2 Air services arrangements

2.1 Paragraph 7(2)(aa) of the Act provides that the Commission must not allocate available capacity contrary to any restrictions on capacity contained in a bilateral arrangement(s).

2.2 According to the Register of Available Capacity, there are 43 frequencies per week available for allocation to Australian designated airlines to operate passenger services in each direction between Hong Kong and the following points in Australia: Brisbane, Melbourne, Perth and Sydney. There are no frequencies available for allocation

for any new allocation for the operation of all-cargo services between Hong Kong and the following points in Australia: Brisbane, Melbourne, Perth and Sydney.

2.3 Under the Australia-Hong Kong air services arrangements, Australian designated airlines may at their discretion freely convert and reconvert capacity for the operation of passenger services and all-cargo services between Sydney, Melbourne, Brisbane and Perth and Hong Kong on the basis of one passenger frequency for one all-cargo frequency or vice versa.

3 Commission's consideration

3.1 Subsection 12(3) of the Act allows any person to apply to the Commission for a determination allocating capacity to enable an Australian carrier to operate international air services.

3.2 Currently, Tasman Cargo has a total capacity allocation on the Hong Kong route of five (5) frequencies allocated under Determination [2023] IASC 130¹. Tasman Cargo is seeking the allocation of one (1) frequency per week to operate an additional weekly freight service between Sydney and Hong Kong.

3.3 Subsection 7(1) of the Act empowers the Commission to make a determination allocating available capacity. Subsection 7(2) requires, in part, that the Commission's determination must not allocate capacity unless the Commission is satisfied that the allocation would be of benefit to the public and would not be contrary to any restrictions on capacity contained in bilateral arrangements, or combination of bilateral arrangements.

3.4 Further, subsection 7(3) of the Act provides that in assessing the benefit to the public of an allocation of capacity, the Commission must apply the criteria set out in the policy statement made by the Minister pursuant to section 11 of the Act.

3.5 Pursuant to section 11 of the Act, the Minister issued the *International Air Services Commission Policy Statement 2018* (the Policy Statement) which came into effect on 28 March 2018. The Policy Statement sets out the criteria which the Commission is required to apply in assessing the benefit to the public of allocations of capacity.

3.6 The Commission notes that there are no other applicants seeking capacity on the route and no opposition to the application. Section 12 of the Policy Statement provides, in part, that in circumstances where there is only one applicant for allocation of capacity on a route, and there is no opposition to the application, the Commission is to have regard to the 'reasonable capability criterion' in section 8 of the Policy Statement and need not have regard to any other matter.

3.7 Under the reasonable capability criterion in section 8 of the Policy Statement, the Commission is required to assess the extent to which all Australian carriers that are, or would be, permitted to use the capacity allocated under a determination are reasonably capable of: (a) obtaining any licenses, permits or other approvals required to operate on

¹ [Determination \[2023\] IASC 130](#)

and service the route to which the determination relates; and (b) using the capacity allocated under the determination.

3.8 The Commission notes that Tasman Cargo is an established international carrier which currently operates scheduled international freight services between Australia and Hong Kong. The Commission therefore finds that Tasman cargo is reasonably capable of obtaining the necessary regulatory approvals to operate on the route and of using the proposed capacity allocation.

3.9 Accordingly, the Commission has concluded that Tasman Cargo satisfies the criteria under section 8. The Commission, therefore, has decided to allocate the capacity as requested by Tasman Cargo.

3.10 Subsection 15(1) of the Act empowers the Commission to include such terms and conditions as it thinks fit. The Commission has decided to issue this determination subject to the conditions set out in Item 4 below.

3.11 Paragraph 15(2)(a) of the Act requires a determination to specify the period during which it is to be in force. Subsection 15(3) of the Act effectively provides that if the Policy Statement sets out how the period of validity of the determination is to be fixed, then the period of validity is as so fixed. In any other case, an interim determination is to be in force for three years, while a determination that is not an interim determination is to be in force for five years.

3.12 Section 20 of the Policy Statement sets out how the Commission is to fix the period during which a determination is to be in force. The Commission considers that this application is within the scope of subsection 20(4) and has decided that this determination is to be in force for a period of five years.

4 Determination allocating capacity on the Hong Kong route to Tasman Cargo Airlines ([2024] IASC 119)

4.1 In accordance with section 7 of the Act, the Commission makes a determination in favour of Tasman Cargo Airlines allocating one (1) frequencies per week in each direction to operate dedicated freight services on the Hong Kong route in accordance with the Australia-Hong Kong air services arrangements.

4.2 The determination is valid for five years from 26 June 2024.

4.3 The determination is subject to the following conditions:

- (a) Only Tasman Cargo Airlines is permitted to utilise the capacity
- (b) Tasman Cargo Airlines is required to fully utilise the capacity no later than 27 October 2024 or such other date approved by the Commission.
- (c) Tasman Cargo Airlines is not permitted to utilise the capacity to provide code share or joint services with another carrier or any other person unless approved by the Commission.

- (d) Changes in relation to the ownership and control of Tasman Cargo Airlines are permitted except to the extent that any change:
- results in the designation of the airline as an Australian carrier under the Australia-Hong Kong air services arrangements being withdrawn; or
 - has the effect that another Australian carrier, or a person (or group of persons) having substantial ownership or effective control of another Australian carrier, would take substantial ownership of Tasman Cargo Airlines or be in a position to exercise effective control of the airline, without the prior consent of the Commission.

Dated: 26 June 2024
