Dear Marlene,

Re: Details for TCA's Expansion Application.

I would like confirm details of our request to be awarded **additional scheduled carrier traffic rights to Tasman Cargo Airlines Pty Ltd (TCA)** ACN 073 412 272 under our Australian IAL.

TCA formally requests that the approvals could be granted as soon as practically possible to commence operations **on or near IATA Northern Hemisphere Summer 2021 Season** subject to all operational & regulatory considerations & constraints.

TCA is majority Australian owned Airline and commits to maintain all associated requirements that are legislated to hold a valid IAL for the Department and relevant Australian Authorities.

**Our Proposed equipment to operate services:**

- Boeing B767-300 – Full Freighter Operations.
- Payload Capacity approximately at or near 54 metric tonnes per flight subject to performance limitations etc.

**Traffic Rights requested:**

- Five (5) x Frequencies Melbourne (MEL) – Hong Kong (HKG) – Melbourne (MEL)

**Capacity/Marketing of Services:**

- TCA will maintain and sell all the available capacity to all parties requesting capacity as applied for.

We certainly appreciate the support of the IASC staff in the process required to obtain this designation to operate these services.

I recognise the short timelines requested however after lengthy market studies we believe that TCA can service this market effectively for the mutual benefit of all parties sourcing Air Capacity on these sectors, thanking you personally for the support in recent times and appreciate advice of our next steps in this application process.

Yours sincerely,

Ross Wyeth  
Alternate CEO – Tasman Cargo Airlines Pty Ltd  
ACN 073 412 272
