Dear Ms Ackar,

Re: *TCA application for unlimited cargo frequencies between AU and HK.*

Because of the recent announcement of unlimited cargo traffic rights being offered between **Australia and Hong Kong SAR**, **Tasman Cargo Airlines Pty Ltd** (TCA) ACN 073 412 272 would like to apply under our approved Australian IAL.

TCA currently holds 7 approved weekly frequencies and once the above has been approved, we would like to revoke those.

**The plan is to operate a combination of equipment as follows:**

- Boeing B777, Model B777-200LRF – Full Freighter Operations – or
- Boeing B777, Model B777-300ERSF – Full Converted Freighter Operations
- Payload Capacity approximately at between 100 and 106.5 metric tonnes per flight subject to performance limitations etc.
- Boeing B767, Model B767-3JHF – Full Freighter Operations.
- Payload Capacity approximately at or near 54 metric tonnes per flight subject to performance limitations etc.

During 2025 TCA will take over the service to/from HKG completely using B767F metal and will no longer require the use of the wet-leased B777Fs..

**Traffic Rights requested:**

- Unlimited Cargo Traffic Rights from Australia to Hong Kong SAR

**Capacity/Marketing of Services:**

- TCA will maintain and sell all the available capacity to all parties requesting capacity as applied for.

We certainly appreciate the support of the IASC staff in the process required to obtain this designation to operate these services.

Yours sincerely,

*Kim Rasmussen*
